● EXPERIENCE

DevOps Personal Projects

- I'm currently hosting my personal projects on digital ocean server
- All projects are containerised and spun up via docker compose: configuration can be found here https://github.com/Meronggk/server-config
- Containers are routed via nginx reverse proxy so that I can host my projects on the same IP with different domains
- Projects are deployed via CI/CD on github so that it can automatically update when I push

Software-Development Trainee

CodeYourFuture

📅 Apr 2022 - March 2023   📍 Manchester , United Kingdom

- Worked within a development team to deliver a web application to enable refugees and migrants advertise and sell their home repair services using Agile workflow
